A PHYSICAL TECHNOLOGY THAT HELPS **MODIFY THE BEHAVIOUR** OF LIMESCALE.

PROTEX INCORPORATES A TREATMENT CHAMBER FEATURING **TURBULENCE GENERATORS AND SPECIAL ALLOY CHIPS.**

*Water passes through **a treatment** chamber designed to maximise contact with the **system's active elements.***

*As water flows through the unit, the behaviour of **limescale** crystals **is modified**, **reducing their tendency to adhere** to surfaces.*

LIMESCALE CRYSTALS REDUCE THEIR ABILITY TO ADHERE TO SURFACES AND FORM SCALE DEPOSITS IN PIPEWORK AND APPLIANCES

PROTEX

osmofilter

THE BEST ANTI-LIMESCALE PROTECTION FOR EVERYDAY

osmofilter

LIMESCALE IS PRESENT IN EVERY DROP OF WATER. — PROTECT YOUR HOME THE SIMPLE WAY—.

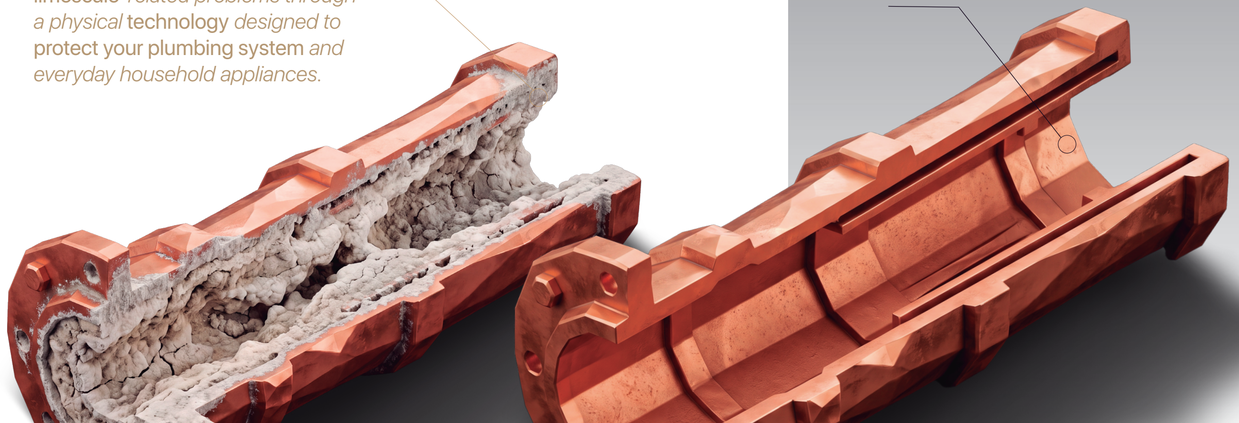

LIMESCALE

- Water heaters
- Boilers
- Heating elements
- Washing machines
- Dishwashers
- Pipework

OVER TIME, SCALE BUILD-UP CAN AFFECT THE PERFORMANCE AND EFFICIENCY OF HOUSEHOLD APPLIANCES.

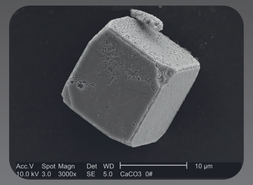

THE **INVISIBLE** PROBLEM OF LIMESCALE

PROTEX *helps* reduce limescale-*related problems through a physical* technology *designed to* protect your plumbing system *and everyday household appliances.*

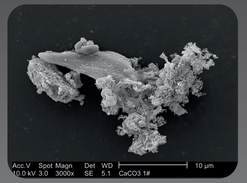

Microscopic images of limescale magnified 3,000 times.

BEFORE PROTEX

AFTER PROTEX

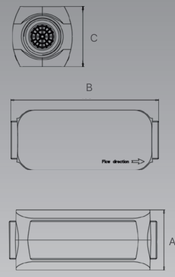

*Before treatment, the crystals are **compact** and **highly adherent.**

Greater tendency to form **scale deposits.**

*After treatment, the crystals are **more dispersed** and **less compact.**

Reduced tendency to settle on surfaces.

LESS ADHESION, FEWER SCALE DEPOSITS.

Technical Data

Product reference: DCAL07
Operating principle: Physical ionic polarisation
Connection: 3/4" and 1"
Horizontal or vertical installation
Operating temperature: 0-99 °C
Operating pressure: 0.15-1 MPa
Dimensions: 163b × 99a × 99c mm

Why choose **PROTEX**?

- *No salt*
- *No chemicals*
- *No electricity*
- *No maintenance*
- *No drain required*
- *Simple installation*
- *Up to 10 years service life*

How does PROTEX help combat limescale-related problems?

PROTEX uses a physical technology that helps reduce limescale's ability to adhere to pipework, heating elements and household appliances, helping to minimise the formation of scale deposits.

Does it require maintenance?

No. It does not require salt, chemicals or routine maintenance operations.

Does it consume electricity?

No. PROTEX operates without plugs or electrical power. The treatment takes place physically as water flows through the interior of the unit.

Where is it installed?

At the main water inlet of the home to help protect the entire plumbing system.

Is it compatible with different types of pipework?

Yes. It can be connected to common copper, PVC and other compatible plumbing materials.
