

It fits where others cannot

Aquaplug 600 has been designed to fit in any under-sink space. Its compact form allows for the installation of a complete reverse osmosis system while occupying minimal space. The perfect solution when space is at a premium.

CLEAR, SIMPLE AND DIRECT OSMOSIS

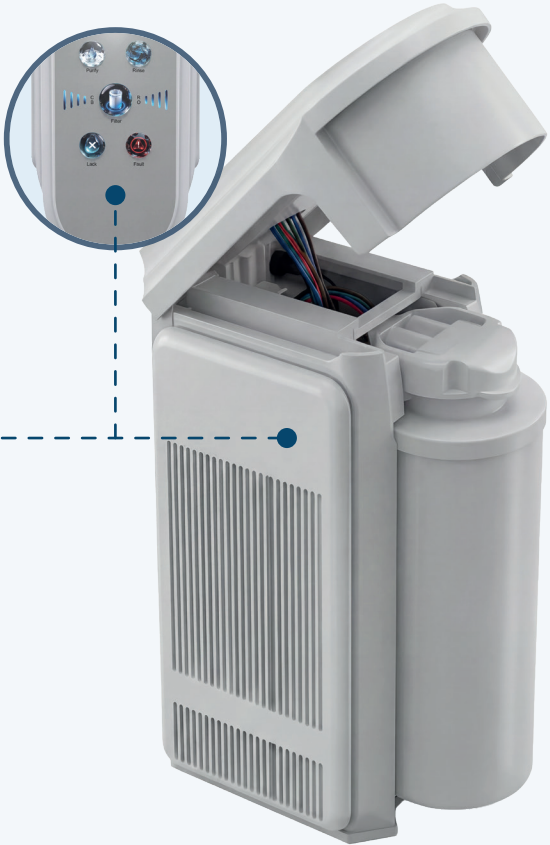

A system designed to offer a real, uncomplicated solution. Everything you need to enjoy purified water at home, with automatic and reliable operation.

INTUITIVE OPERATION

Indicator lights that show the status of the equipment at all times:

- Purification
- Automatic rinse
- Filter status

The system can be expanded with post-filtration solutions. Consult your sales representative.

INTEGRATED SECURITY

System equipped with:

- Automatic operation control.
- Protection against incidents.
- Safety stops.

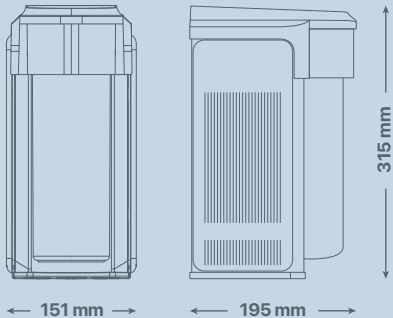

DESIGNED FOR EVERYDAY USE

AQUAPLUG 600 has been conceived as a balanced solution, combining size, performance and functionality in a single unit.

TECHNICAL DATA

- Production: 1.60 L/min
- Membrane: 600 GPD
- Power: 72W
- High-end faucet.
- Direct flow system.
- Under-sink installation
- Dimensions: 151 x 195 x 315 mm
- Weight: 4.80 kg

Direct flow 600 GPD

Constant production for everyday household needs
